Hi Guys,

I would like to announce the availability of COMODO Firewall Pro 3.0.11.246 RC1.

What's New ?

- This release is mostly about the fixes for the small bugs reported by our beta testers.
- Some stability issues are resolved

Known Issues

- In some PC configurations, Defense+ may report partial functionality error
- DoS detection is not active yet
- Predefined rulesets(Firewall and Defense+) are not final yet

For 32 Bit Operating Systems(XP or later)

http://download.comodo.com/cfp/download/setups/rc/CFP_Setup_3.0.11.246_XP_Vista_x32_RC1.exe

For 64 Bit Operating Systems(except IA64)

http://download.comodo.com/cfp/download/setups/rc/CFP_Setup_3.0.11.246_XP_Vista_x64_RC1.exe

Thank you,

Egemen
